Step Two

Install the Brass Wellnuts.

Locate the two holes in the wheel wells on each side of the vehicle. They are covered by rubber plugs. Remove the plugs.

Locate the Brass Wellnuts in the parts kit. Use the tools provided to install them into the holes. Make sure that the flange of the Wellnut is completely against the metal while installing.

Step Three

Replace carpet.

Replace the carpet, smoothing it out and covering the Wellnuts. Use a utility knife to cut a 1" vertical slit in the carpet at each Wellnut location.

Step Four

Install INSTATRUNK™.

Place the INSTATRUNK™ in the vehicle aligning the holes in the trunk with the Wellnuts. Install a Knob through the trunk into each Wellnut.

Step Five

Install Weatherstripping.

Locate the Weatherstripping in the parts kit. From the rear of the vehicle start installing the weatherstripping on the driver's side and work across to the passenger's side. Peel the backing off the weatherstripping a few inches at a time and press the adhesive on the weatherstripping onto the edge of the trunk.
